

HARO Design Family

The modular toilet seat system

3 designs + 3 mounting types – that is the simple formula with which Hamberger Sanitary reduces the selection of the correct toilet seat to its most important aspects. Based on a seat ring that fits universally on all standard ceramic as a “platform”, with 3 entirely differently designed toilet seats, three entirely new designs were created:

Design 1, the Lago or Lavas toilet seat as a SoftClose® classic variant appears timeless and elegant with its soft formal idiom. Design 2, the Fago or Favos model as a SoftClose® classic reveals an exciting and contrasting design. The third design, the Pago or Pallas model as a SoftClose® classic, has clear lines that ensure a contemporary toilet seat full of character.

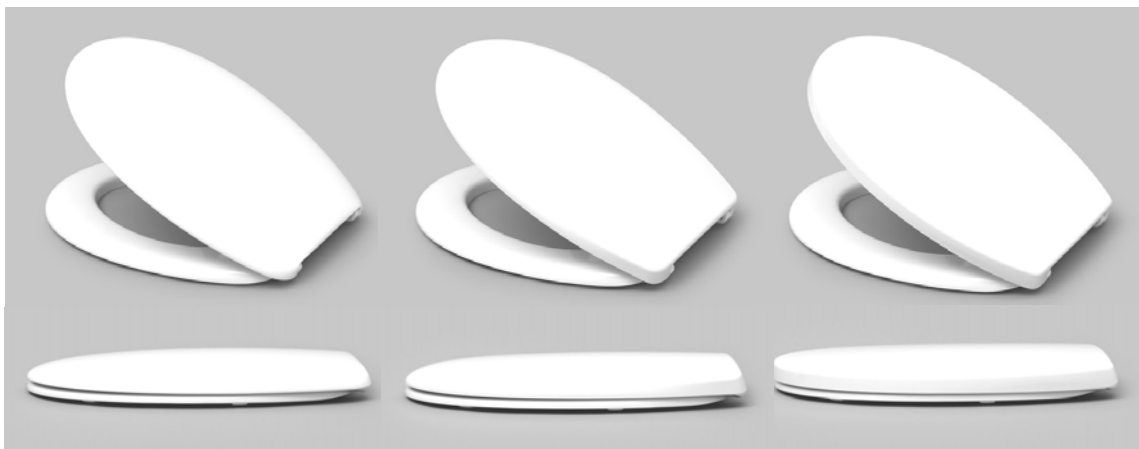

These three design seats are combined as individually required with one of the three mounting types offered in the system. Starting from classic standard mounting with a tried-and-tested hinge, the second variant with SoftClose® pure already offers a cost-effective entry into the SoftClose® segment. SoftClose® means that a slight touch is sufficient for the toilet seat to gently and quietly close automatically. A convenient thing you wouldn't want to miss. In SoftClose® pure, Hamberger Sanitary now offers a new implementation of the SoftClose® automatic closing system, which also makes the topic of SoftClose® attractive for smaller budgets while achieving the common high level of quality. Mounting variant three offers with the classic SoftClose® the noblest solution, which allows removing the entire toilet seat with

only one movement for thorough cleaning with the TakeOff® function.

The HARO Design Family therefore allows, structured in an easy way, combining the perfect-fitting toilet seat and thereby finding the right solution for every taste and every budget.

Hamberger Sanitary GmbH based in Rohrdorf near Rosenheim is now the largest manufacturer of toilet seats in Europe and operates production sites in Germany and Bulgaria. Hamberger has been manufacturing WC seats since 1912. The fact that the company develops its own designs, uses its own established hinge technology and operates a global logistics network forms the basis for its success. The company was established back in 1866 and is now managed in the fourth and fifth generations by Peter Hamberger and his son Dr Peter Hamberger. The company has constantly acquired new shares of the market and is now the largest manufacturer of duroplast toilet seats anywhere in the world. Around 50% of its products are exported to more than 50 different countries throughout the world. Further information is available at www.hamberger-sanitary.de
