

Design with a Perfect Fit

Hamberger Sanitary – pioneers in the development of ergonomic WC seats

The WC today is more than just functional sanitary ware: It is a design element in bathrooms, which shows an increasing trend away from “the smallest room” towards a wellness area. To meet both these objectives Hamberger Sanitary has for years developed designs with a perfect fit.

To Hamberger Sanitary, a WC seat is not just a ring with a cover: It is also seating furniture for the bathroom and thus has to meet specific ergonomic requirements. Hamberger Sanitary is pioneering the development of health-promoting WC seat designs: The research and development department focuses not only on innovative designs and cutting-edge, high-performance hygiene technology, but also on how to make sitting more pleasant and comfortable. Optimally adapted to the body shape, HARO WC seats therefore encourage a healthy and ergonomic posture. Medical aspects like these play a decisive part in these products made in Germany. After all, the smallest room is visited several times a day.

Hamberger Sanitary's new Mondena WC seat, which has won the prestigious international “Design Plus” award, is an example of the successful design of an ergonomic seat ring. The graceful, gently curved lines follow the natural shape of the body and ensure a relaxed, comfortable sitting position. Smooth contour transitions and rounded edges add to the overall sense of well being.

Hamberger Sanitary GmbH in Rosenheim near Munich, Germany, today is the largest manufacturer of WC seats having its production facilities in Germany. The Sanitary Ware division has been manufacturing WC seats made of wood and plastics since 1912, with the development of its own designs and ingenious hinge technology forming the basis of its success. The enterprise which was founded in 1866 is today managed by Peter Hamberger and Dr. Peter M. Hamberger, in the fourth and fifth generations. The export share of the company is over 50%; exports are world-wide into more than 50 countries.
