

HARO Wins “Design Plus” Award

Mondena WC seat convinces through innovative styling

Light as a feather the new Mondena WC seat from Hamberger Sanitary seems to ‘hover’ above the ceramic: The innovative, delicate styling has been awarded the prestigious international “Design Plus” award at the ISH 2007 trade show in Frankfurt, Germany.

Developed in conjunction with the designers of the German agency Product Innovation Lounge, the WC seat provides added value through its perfect synthesis of form and function. Stylistically the new WC seat focuses on the essence. Its sleek, clean-cut contours are a classic example of the art of simplicity, while the graceful, gently curved lines give the impression of sheer weightlessness.

Optimum functionality

With its ergonomic seat ring that is optimally adapted to the body shape, the Mondena from Haro offers a unique, comfortable design. The universal fit is complemented by optimum functionality. The Mondena comes with the patented TakeOff hinge, which allows effortlessly removing the entire seat for cleaning. The Haro WC seat is additionally equipped with the integrated SoftClose system, whose automatic closure mechanism closes the lid with a gentle touch of the finger. SoftClose comprises a high-quality stainless steel eccentric hinge for which HARO offers a 10-year warranty.

Superior quality ensures perfect hygiene

The Mondena succeeds not only through its inimitable fusion of form and function, but also through superior quality. Made of the Duroplast material "urea" the surface of the WC seat will remain shiny and scratch-resistant even after years of use and prevent dust buildup thanks to its antistatic properties. The smooth contour transitions and the rounded polished edge not only give the seat a delicate filigree appearance: By eliminating hard-to-reach places and dirt traps they also make the seat very easy to clean.

Comfortable, simple to use and elegant in style: With the Mondena, Hamberger Sanitary continues on its path to promoting the art of bathroom design.

Hamberger Sanitary GmbH in Rosenheim near Munich, Germany, today is the largest manufacturer of WC seats having its production facilities in Germany. The Sanitary Ware division has been manufacturing WC seats made of wood and plastics since 1912, with the development of its own designs and ingenious hinge technology forming the basis of its success. The enterprise which was founded in 1866 is today managed by Peter Hamberger and Dr. Peter M. Hamberger, in the fourth and fifth generations. The export share of the company is over 50%; exports are world-wide into more than 50 countries.
